COLEMAN PEBBLES

Happenings of Interest in and Around this Bustling Town. You are Talked About

BORN—On April 13, a daughter to Mr. and Mrs. Frank Guiney.

Baptist service was held in the I.O.O.F. hall last Sunday morning.

BORN—To the wife of Mr. Paul Gordon, a daughter on April 23rd.

A car load of plaster put received at the Coleman Hardware Co.'s store.

C.P.R. new railway line from Toronto to Sudbury will open on June 15th.

Wm. Sandvide, the pioneer logging man of this district, has closed his camp.

H. Platt Miles, brother of Constable Miles, who was formerly stationed here, is in town.

Coleman will hold a monster celebration on Dominion day, July 1st. Particulars later.

Alberta musical festival will be held at Edmonton on May 5th. Reduced railway rates.

Read this number of the "Miner" all through. There is something in it to you.

Change for advertising MUST be in the office not later than Tuesday evening of each week.

For fire wood apply to Coleman Wood Yard. Orders taken at Coleman Mercantile Co.'s store.

W. H. Gibson's camp has ceased operations, and preparations are being made for next winter's work.

Constable T. Green is in charge of R.N.W.M. Police at Coleman. He has an assistant in John Schreyer.

A degree team of the I.O.O.F. will go to Michel in a week or two to assist in instituting a lodge of the order there.

The cricket enthusiasts are soon going to hold a meeting to re-organize. Mr. J. Hatfield has a full set of bats, balls, etc.

C.P.R. passenger rates to the fat stock show at Calgary, to be held May 19 to 22, will be single fare, good from the 17th to 25th.

\$500 Cash and easy terms on balance, buys one of the most comfortable and well finished cottages in town. Apply at postoffice.

Mr. Aiken of the Coleman Mercantile, is coming to his bed with rheumatism at the house of Mr. Hames of the Co-operative store.

Wanted: A reliable man for private board. Terms moderate. Apply Mrs. H. Greucutt, next door to King's church, Coleman.

At the board of the peace, Tuesday evening, O. E. S. Whiteside, W. L. Ouimette and H. Morton, were accepted new members.

Fred Smith met with an accident last Thursday, falling across an iron pipe. He is getting better, his many friends wish him to recover.

E. Disney, justice of the peace, fined three slaves each and costs last Friday for cruelty to a cow. Another man at Frank received six months for stealing a device.

Fraternal Order of Eagles will attend memorial service at the Institutional church on Sunday afternoon next at 2 o'clock. All brethren are requested to be at the hall at 2.30.

Local Chinamen are complaining that most of the washing is now going to steam laundries. Their former independence and high prices no longer so easily maintained.

The Alberta government have made an appropriation of \$800 to be spent in repairing the road between Coleman and Frank. It is hoped the work will be commenced very soon, as the road, when it rains, is in an almost impassable condition.

Last Saturday our own Jim Burrows was crossing the Old Man's river driving a cow and conveying a calf in a buggy, when something happened. Jim floundered in the water too deep jumped a board in order to get across, but the board and the rider went to the bottom, and as they were going down the third time the calf jumped from the buggy, and by a miracle got between Jim's legs and landed him on dry ground, a wetter, but wiser man.

Harry Higgins had a similar experience but had to swim for it and held up his horse's head as well as save its life. They intend to get life preservers after this.

Bowling on the green, is a new sport in Coleman. It is also a healthy, clean sport. An enthusiastic meeting was held in the I.O.O.F. hall Monday evening for the purpose of organizing a club here. A committee consisting of Mr. Mills, W. G. Morris and D. L. Stuffer were appointed to look after the grounds and find out the cost of levelling off, sodding, etc. A Cameron, G. P. Porter and R. Macleod are another committee to canvas for subscriptions. The price of admission to the club will be \$5. Member shoes and white trousers are the costume. G. P. Porter was chairman and D. L. Stuffer acted as secretary of the meeting.

A well attended meeting was held on Wednesday evening last week for the purpose of organizing a young people's society of Christian Endeavor in connection with the Presbyterian church. Rev. T. M. Murray opened the meeting and referred to the purpose of the meeting was called. The following officers were elected: H. Morton, president; Rev. T. M. Murray, secretary; Mr. Hames, vice-president; Robert Holmes, treasurer; Mr. Kelley, secretary. Mrs. Macleod, organist; Mrs. Jobbitt. The first meeting of the society was held in the Presbyterian church on Wednesday evening at 8 o'clock and a special invitation is extended to all interested persons.

ODD FELLOWS' DAY

Last Sunday the I.O.O.F. Attended St. Alban's. Fine Day. Excellent Sermon by Rev. E. H. Webb

On Sunday afternoon last at 3 o'clock the members of Coleman Lodge No. 36, Independent Order of Odd Fellows, marched to St. Alban's church in a body.

About eighty members were in the procession and several of the brethren from Frank were also present. The day was one of those beautiful, warm sunny days so usual in Coleman. The long line of Odd Fellows made a splendid appearance, and were well marshalled by brother R. Laird.

Special music was rendered at the church, and the hymns were sung heartily, the whole congregation (composed mostly of Odd Fellows) joining heartily with the choir. Mr. Crawford, the organist, presided at the organ in his usual acceptable manner.

The altar and chancel of the church were decorated with beautiful wild flowers, and also a large cross made by Miss E. A. Anthony, who takes a great interest in this work of love.

At the conclusion of the sermon "Nearer My God to Thee," making a very pretty quartet, was sung by the gentlemen, Thomas Leyshon, first tenor; D. L. McPherson, second tenor; W. H. Hayson, second bass; A. T. Davis, bottom bass. The selection was well rendered, the combination of voices being excellently blended.

The large edifice was filled to the doors with an appreciative congregation, who listened with warm attention to an excellent sermon delivered by the incumbent, Rev. E. H. Webb.

Mr. Webb is a forceful speaker and drives home his arguments in such a manner as to leave no doubt in the mind of the listener as to their meaning. The discourse throughout was full of Old Fellowship and one of good, sound advice, and will be of great benefit, not only to Odd Fellows, but to all who had the pleasure of hearing it. For the benefit of those who were not at church on Sunday the sermon is here given:

Our actions are governed by the mind. It is the mind that rules the body. "As a man thinketh in his heart, so is he." We are what we think, and we think of purity, we shall not be pure. Unless we think of noble things, we shall not be noble, and unless we have the high thoughts we shall not have the high life. These statements must be very transparent to every thoughtful man. The intellectual man, who respects for the just, the pure and the noble. He even speaks lightly of these virtues and the only way by which you can change him is by getting him to centre his mind on these things as his habitual thoughts.

Our life is governed by our visions, our ideals, our master thoughts. If you tell me what your daily, habitual and unconscious thoughts are, then I will tell you the sort of life you live. If you fix your thoughts on things that are true and just, you will become true and just, and if you fix your thoughts on the low, mean and sordid, then you will become low, mean and sordid. That is the inevitable law. Pigs do not grow on thistles, or grapes on thorns. A corrupt tree cannot bring forth good fruit, neither can a good tree bring forth evil fruit.

We are governed by our ideals or aspirations, and that upon which we most commonly fix our minds, we most resemble. They shape and mould our life and character. If your thoughts are never centered on the Christ of Nazareth, and even supposing there is a present who doubts Christ's Divinity, yet taking Him as a mere man, every man present is prepared to admit that He is the most beautiful figure in history. If you never think upon Christ how can you be Christian? If your constant thought is how you can best make use of your fellow man to raise yourself higher; how you can best outdo him and grind him out of dollar out of him, can you manifest that fraternal spirit which should characterize every true Odd Fellow, and see in every man a brother?

If you will take the trouble to study the biography of any great life, you will find that the motive power of such a life was its master thought. And you, young man—you on the threshold of life—if you will tell me your master thought, then I will tell you what you are going to be like.

It is often said that it does not much matter what a man thinks or believes, if his life is right. True. But the life never can or will be right unless the spirit of the thought is right. Fraud, lust, lying, cheating, treachery, murder—all have their origin in the "thoughts." Everything that a man thinks, if a man's mind is steeped through and through with fraud, lying and cheating—if his thought is not clean, then his life will not be clean.

I have heard some men speak of a certain vice as a "necessary evil." I say, emphatically, NO. There is no such thing as a "necessary evil." It is the mind that rules the body. If a man's ideals or thoughts are low, dirty, sordid and licentious, he will sink to them. If they are high, pure and noble, then he will go to them. We are governed by our thoughts.

Young man! You, treading on the threshold of life, you, young, warm blood coursing in your veins, if you allow your thoughts to dwell upon the things of this world—even though you do not carry your thoughts into action—you are tampering and playing with that which goes to make up true manhood—pure and lofty thought. If you would be pure, master your thoughts and fix them on purity. If you would live a high life and be true to the spirit of your Order, true to your God, true

to your fellow man, and true to the great principles of Friendship, Truth and Love—then your thoughts must be centered on these things.

I am afraid that in our anxiety to carry out the letter of the Order, we are in danger of overlooking the Spirit. I would therefore impress upon you the fact that Odd Fellowship is not its regalia, or the decorations of its officers and members; neither is it the efficient manner, which we may "put on" the work. All this might be dispensed with and Odd Fellowship still remain. These are but the husk, the shell, the drapery, which encase the great principles of our Order. Neither does Odd Fellowship consist entirely in deeds of mercy, benevolence and brotherly love. These are but the outward expressions, and to produce these good works there must be an inward spirit of Fraternity and brotherly love. The heart of Fraternity and the brotherhood of man are our great principles, and without these, whatever may be our ritual, ceremony and decorations, we shall miss the object for which we exist.

Centre your thoughts on God. Fix them on His love, His mercy and His peace. Let Him be your Father and your brother to be loved and helped. (Stamantian) Let then, the Fatherhood of God and the brotherhood of man be your guiding principles. Let your mind be steeped in the spirit of brotherly love, and don't be too ready to find fault with and condemn your fellow man. Let Christian charity ever be your guide, and as you pass through life—

"Deal kindly with the erring one, He is too weak to be treated so. However darkly stained by sin, He is too brave yet to be treated so."

A child of the self-same God, He is heir of the self-same heritage. He is too good to be treated so. Thou hast in weakness trod, Forget not that thou hast often sinned. And still yet with the erring one, Deal kindly with the erring one. And thus deal with the erring one."

Deal kindly with the erring one, He is too weak to be treated so. However darkly stained by sin, He is too brave yet to be treated so."

Announcement

We beg to announce that we have purchased the business lately carried on by Messrs. J. M. Hill & Co. We intend adding to the present stock a complete assortment of

General Dry Goods

Ladies' and Children's Boots and Shoes

Crockery and Furniture

By keeping a well assorted stock of such goods as the people want. By selling at moderate prices, and by giving close personal attention to business, we hope to merit and receive a fair share of the trade.

Gilson's Little Girl.

By LULU JOHNSON.

Copyright, 1909, by E. G. Parcells.

"My little girl," Gilson called her to himself, and of all in the human tide that twice a day swept through the gates of that section of the concourse devoted to the suburban traffic, the gatekeeper liked best the little blue-eyed girl. She reminded him so strongly of that other little blue-eyed girl who in a happier day had greeted his comings and goings and had called him "father."

That was before the tunnel wreck three years back, when they had carried her and her mother home—two victims of the worst disaster the road had ever known.

The claim agent had learned that Gilson was without work and had settled the damage claimed by providing him with a life annuity of \$200 a month on the big station. Ever since then Thomas Gilson had watched the tide of humanity ebb and flow through the iron gates and had found solace in the crowd.

Until the blue-eyed girl had come, not quite three months before, he had watched indifferently the hurrying throng. The busy ebb and flow of the announcer's megaphonic voice.

Then one night he glanced up into the face of a girl so like his own dead daughter that his heart stopped for a nervous hands, and he held them both years ago in his unconscious.

The ring of the metal on the concrete pavement roused him. His hands dropped to his side, and he took up his old routine of inspecting tickets, but the grimy train shed, with its smoke stained walls and its wastes of clunder bed tracks, held a new interest for him.

The monthly ticket which she presented was brand new and proclaimed her a recruit to the army of commuters who daily took their lives in the city's commercial field, and he knew that each night he should see her come hurrying down the concourse toward the gate.

Later, when she learned that the regular commuters never displayed their tickets, she would perhaps give him the little nod and smile of friendly recognition that the man who had always vouchsafed the guardian of the Gilson's memory for faces was remarkable. He knew all of the commuters by sight and had a nod for each.

It was not long before Gilson "got her trains." She came in on the 8:27, and every night she hurried to catch the train that she could not miss that train, having to wait for the 7:58 and thereby missing also her dinner.

She never went out for dinner when she missed the earlier train, but sat in the great marble waiting room, Gilson, quick to deduce, knew that the money she earned was so sorely needed at home that she could not spare the sum that would buy an extra meal in town.

The old gatekeeper did not go on duty until 9 o'clock in the morning, but he was always there now at 8:27, standing by the exit gate when the suburban trains came rolling in, and that was how he came to know that Metcalf had become interested in her.

Usually they came together down the platform, and only a glance at the girl's face was needed to tell that she liked Metcalf. Later on Metcalf took her to the 8:45 train, and the 6:43, which was an express and stopped only at the more important stations. No matchmaking mother ever watched the social progress of her daughter with greater solicitude than did Gilson watch the growth of love between Metcalf and Miss Traynor.

He had known Metcalf (he had learned the names on the commutation tickets) ever since he had come to the station. Metcalf seemed a nice, steady going young fellow, for he seldom varied over until the theater train, and each morning his face was clear and his hand steady. His appearance betokened his prosperity, and Gilson rejoiced that his little girl was making so good a match.

Then came the day when the little girl came down the platform by herself, her head held high and her cheeks flaming. Metcalf lingered in the rear, and he, too, was flushed and angry. Gilson's heart was troubled, though he tried to tell himself that all would be made smooth that night.

But it was not made smooth. Metcalf did not appear until just in time for the 7:58, and there were traces of tears on the little girl's face as she passed through the gate to take the 8:45.

Once during the week they both came in by the same train, but Metcalf was in the smoker and the little girl was in the last car.

She tried very hard to look as though she did not care, but Gilson's sharp eyes could see the change, and he worried so that he let a fussy old lady take the next accommodation in the belief that it was the throes of the expression, which fact was duly reported to headquarters and resulted in Gilson's being forced to economize for a week to cover his fine.

Then came the night when the little girl, hurrying to catch her train, found the gate shut just as she approached.

"You are mean!" she cried, with a stamp of her tiny foot. "I could have made it easy."

"Orders to close the gate on signal," reminded Gilson stolidly.

"But the train had not started to

GREAT CAMPAIGN IN LONDON.

To Wage War on Behalf of Public Morality.

A great campaign, backed by the weight of every religious denomination, is to be waged in London, England, on behalf of public morality.

The war was recently opened on the platform of the Queen's Hall, in support of the crusade, the Bishops of London and Southwark, the Archbishop of Westminster, the Rev. St. Liddell, representing Nonconformity; Mr. Percy Harris, the chairman of the London County Council, who presided and represented the governing body of London; and the mayors of nine London boroughs. The Archbishop of Westminster, voicing the forces of Roman Catholicism, sent a most sympathetically worded message, too, did the Archbishop of Canterbury and the Chief Rabbi, Dr. Adler.

Organizing this important movement is the London Council, for the Promotion of Public Morality, which was so active recently in its protest against "living in sin," and which has been the support of the Bishop of London.

"Religious London intends to speak with one voice," declared the Bishop of London in an eloquent speech, "the hitherto weak, I believe, be omnipotent." The bishop then outlined the details of the approaching campaign. They are as follows:

1. The strong discouragement of all degrading spectacles and exhibitions.
2. The removal from shop windows of undignified incentives to vice.
3. The suppression of those cheap illustrated papers which contain pictures of a directly suggestive character.
4. The abolition of questionable houses.
5. The elevation of public opinion until what is condemned in woman is no longer condoned in man.

"By such drastic reforms as these," said the bishop, "and by them only, can we hope to bring about a decent city; and if the law fails to help us, the bishop of Southwark and myself feel confident that we should carry with us the great weight of public opinion were we to bring a suitable bill before the House of Lords. Certainly we should such a project, obtain the courageous support of the Labor members of the House of Commons."

HOW TO SUCCEED.

Andrew Carnegie Gives Advice to Brooklyn Students.

"The curse of drink is the cause of more failures than anything else. You can surmount every other faulty habit, but the man who is a confirmed drinker has not one chance in a million of succeeding in life," said Carnegie recently in addressing the evening classes of Frazer Institute, Brooklyn, at their commencement exercises.

"I want to say that the next generation regard smoking as this one regard, and that is the worst thing the next generation, the generation after that, perhaps."

"I am content with merely doing your duty. Always do a little more, and the wise employer will soon be your patron. If your employer is not wise, keep looking around. Some employers have the reputation of promoting their men and making them rich. That's the kind of an employer you want to find."

"Another thing, the man that doesn't know a little more about the work he is assigned to than his employer knows is a poor stick."

"It is well to know your employer, know you know more than he does, if you don't just exactly say it. I have seen a man who was a story of the winning for a bride an employer's daughter by one of his bright young men, exclaimed: 'How much better for the daughter to marry a young American or British than that kind of a man who would throw herself away on a worthless duke!'"

BANK DEPOSIT LEFT FOR 80 YEARS.

In one of the payments to a man deposited in a trust savings bank in 1826 was not claimed by the person in which name it was deposited until February 1st of last year. By that time it had accumulated to ten times the amount of the original sum, solely by the addition of interest.

The Inspection Committee of Trust Savings Banks in their annual report recently issued point out that such deposits are almost at the mercy of any fraudulently disposed officer with knowledge of the facts, especially if he has possession of the genuine pass-book, and they had long advocated the adoption of a rule requiring such accounts to be earmarked by transfer to a separate ledger after seven or ten years, during which no transactions have taken place.

Now there are 222 banks open. The number of depositors in the general departments was 1,779,000, and in special investment departments 66,000. In both departments the amount of deposits was in cash \$59,114,300, and in stock \$2,853,600. In the special departments \$1,659,140,000 cash had in hand \$229,000, and other assets \$599,985.

Are Sea Turtles Animals?

A weird but curious complaint has reached the Bureau of Insular Affairs of the War Department relating to the sea turtles. The Cuban Consul at San Juan, P. R., has written the officials of sea turtles. The point at issue is whether these monster turtles should be paid duty as "animals" or otherwise classified, or come in as "reptiles" free of duty. That a turtle is an animal is not in question, but those in the industry, which heretofore had flourished on the south side of the island.

In this contention, the claim is made that Roman Catholics consider that a turtle is not flesh. It is suggested that the Cuban Consul should inform the officials of the island in making the classification the ruling of the U. S. Government in classifying frogs, lizards and snakes.

WHERE WOMEN WORK.

Hardest Labor Done by Females in Many Parts of the World.

It is hard to go to any part of the world without finding women employed in many lines of work. Even in civilized lands their occupations include cleaning streets, working in the mines, and running along-side the ships.

WHERE WOMEN WORK.

Hardest Labor Done by Females in Many Parts of the World.

It is hard to go to any part of the world without finding women employed in many lines of work. Even in civilized lands their occupations include cleaning streets, working in the mines, and running along-side the ships.

Unwomanly as these tasks are, it is nothing to what women endure among uncivilized people. There they are hard property, forced to do all the work while their husbands and masters devote themselves to making easy money by passing much of the time in pleasant idleness.

Among the lowest tribes in Australia women are only the domestic slaves of their husbands, and do all of the hard labor. They catch the fish, turtles, crabfish, and shellfish from the sea. The women work the soil for yams and tomatoes, and gather the coconuts and bread fruits. The men spend most of their time making the women do the housework, and in drinking they are having their wives neglect their work they drag them severely.

Among the Maori of New Zealand women work in the field, make the clothes, cook the food, and look after the children. In war most of the women draw the water and carry the food to the men who are in the trenches. The women think themselves men and they take life easy. The favorite way of punishing wives is to add to their labor. If a wife complains of her husband's work, when we give our women plenty of work we are sure to keep them out of mischief.

Most of the lower African tribes believe women are good drudges and do more work than men. In many of the tribes the women are the cattle herders, and they carry the milk to the kraal, where the cattle are kept, and their women work in the fields, draw the water and carry the heavy loads. When they go to market the women carry the produce on their heads, and they carry a stick, ready to use it on the slightest provocation.

It is not unusual to hear these men say, "My wives are my property, but them, therefore they must labor." The women practice the strictest economy, and their husbands can buy second wives.

In Tibesti the women are cast aside if they do not work hard enough to support their families. They go off on raids and hunt which last for months. The women take care of the children, and they carry the goats. They buy and sell and go into the interior. To chew tobacco is their chief recreation.

Among the Senegals, in the northeast of Senegal, besides working in the fields and caring for the children, the women are the carriers of water. It is common for husbands to send them to do the fighting.

The Montbani men, in the Ubangi, hold their wives in much the same way. Every bit of the agricultural work is done by the women. When the men are away, the women become beasts of burden.

In traveling, the Algonquins of Brazil take their wives and children with them. The women do all the work of the tribe, where it is necessary to tell the trees, this employment is given to the women.

In Java the women alone attend the markets and conduct all the business of buying and selling.

Tears Relieve the Brain.

"Tears, I believe, I know not what they mean," but Dr. Wagnon says that they are the most powerful of the human body. They are the most powerful of the human body. They are the most powerful of the human body. They are the most powerful of the human body.

Out in British Columbia the newspapers grow urban and, further, even visionary. And it is interesting to note that the newspapers of the past few years have been so full of gold and copper and silver and diamonds and rubies and pearls and precious stones and precious metals and precious minerals and precious fossils and precious plants and precious animals and precious birds and precious insects and precious reptiles and precious amphibians and precious fish and precious mollusks and precious crustaceans and precious arachnids and precious annelids and precious nematodes and precious rotifers and precious protozoa and precious bacteria and precious fungi and precious algae and precious lichens and precious mosses and precious ferns and precious gymnosperms and precious angiosperms and precious mammals and precious birds and precious reptiles and precious amphibians and precious fish and precious mollusks and precious crustaceans and precious arachnids and precious annelids and precious nematodes and precious rotifers and precious protozoa and precious bacteria and precious fungi and precious algae and precious lichens and precious mosses and precious ferns and precious gymnosperms and precious angiosperms and precious mammals and precious birds and precious reptiles and precious amphibians and precious fish and precious mollusks and precious crustaceans and precious arachnids and precious annelids and precious nematodes and precious rotifers and precious protozoa and precious bacteria and precious fungi and precious algae and precious lichens and precious mosses and precious ferns and precious gymnosperms and precious angiosperms and precious mammals and precious birds and precious reptiles and precious amphibians and precious fish and precious mollusks and precious crustaceans and precious arachnids and precious annelids and precious nematodes and precious rotifers and precious protozoa and precious bacteria and precious fungi and precious algae and precious lichens and precious mosses and precious ferns and precious gymnosperms and precious angiosperms and precious mammals and precious birds and precious reptiles and precious amphibians and precious fish and precious mollusks and precious crustaceans and precious arachnids Coleman, Friday, May 1, 1908

WHERE AND WHAT COLEMAN IS

Coleman has been in existence but four years, and during that time has grown to great proportions, so much so that it is now the largest town in the province of British Columbia. For a place of no consequence to become a town of great importance within four years means that Coleman is a place of no mean importance. That this place should grow to a town of 2,500 in four years without advertising, means that in the next four years with a newspaper established, it will grow to 5,000 at least.

Coleman is situated sixty miles west of Macleod on the line of the Crow's Nest Pass railway. It is in the wonderful and picturesque Rocky mountains, ten miles east of the border of the province of British Columbia. The town is supported principally by the International Coal & Coke Co., Limited, which company own the town site and have town lots for sale.

The climate is healthy and the winters are not severe; the thermometer seldom falling 10 below zero. Without doubt the coal company have the best plant and finest machinery in any town in the Crow's Nest Pass. The machinery is well put in, and the men have everything at their command to do the work. Over 600 men are at present employed at the works, and a finer class, and a more gentlemanly lot of miners cannot be found in any mining town in Canada.

The business portion of the town consists of bright, obliging men—all of them—men of integrity and worth.

Coleman possesses a system of water works second to none in the province of Alberta. The water comes from a spring up in the mountains and is of the best. No town in Alberta (and the writer has seen many of them) has a better electric lighting system, and the rate is lower than any town in Alberta. At night when the clear lights are sending forth a bright, clear light like the midday sun, Coleman has the appearance of a modern city.

Coleman is blessed with splendid religious and educational facilities. The Roman Catholic Church of England (Episcopal) and Institutional denomination are established here, and the religious training well carried out. Rev. Father de Wilde is priest of the Roman Catholic Church, Rev. E. H. Webb incumbent of the Church of England and Rev. T. M. Murray, pastor of the Institutional Church. There is also a Baptist church having service here.

Educational facilities are of an excellent nature, and the children in that respect are well looked after, thanks to the splendid board of education and the village council. The trustees are: D. J. McIntyre, Alex. Cameron, Frank Graham, E. H. Webb, secretary. The school staff is composed of: J. H. Manthorne, principal, Miss K. McNab, Mrs. Jobbitt. Coleman should feel proud of the teaching staff, as from the highest class to the wee totos this department is well looked after and the children receive excellent training. The attendance has grown so much that the board is contemplating erecting a large addition to the school. Already several classes have to be accommodated in a house.

Coleman has a good, progressive board of trade, O. V. Benedict being the president.

In the way of lodges and fraternal organizations Coleman has its share. There are splendid lodges of the Masonic order, the Independent Order of Odd Fellows, Knights of Pythias, the Fraternal Order of Eagles, the Owls, also the Miners' Union. The Institutional church has also a club in connection with it. In sports there are the foot ball club, the base ball club, the hockey club and the tennis club.

Last, but not least, there is a good list of progressive businesses—Coleman Hardware Co., Coleman Mercantile Co., Quimette, Wright & Co., general merchants, Coleman Co-operative Store, general merchants, P. Burns & Co., Limited, and "41" Meat Market, Limited, butchers, Eastern Townships Bank, A. Cameron, watches, clocks and jewelry, Frank Graham, hair dresser and tobacconist, Coleman Drug Co., Miss McIntyre, millinery, McIntyre & Nathan, real estate and insurance, W. Evans, wholesale liquors, ice cream parlor, Burrows and Higgins, livery, E. Disney, contractor, Davies & Hamar, builders, Hotel Coleman, H. Morton, proprietor, Grand Union Hotel, L. Manly, proprietor, Sellers & Slemmon, painters and decorators, Tom Plant, dray line, C. I. Goody and Tom Lee, Chinese laundries. Last of all comes the Coleman "Miner," the best printed, most newsworthy and best conducted newspaper in southern Alberta.

The outside public who have not learned much about Coleman will be pleased to know that it is a busy, progressive and go-ahead town.

Coleman Brass Band

On Tuesday evening a well represented meeting of citizens met in the fire hall for the purpose of re-organizing the citizens' band. L. M. Nightingale was instrumental in the re-organization and he was elected leader. D. E. Roberts is president, Alex. Easton secretary, and Thomas Leyshon, librarian. The members of the band playing instruments are:

Cornets—Luther Nightingale, Wm. Crawford, Joseph Millie, Alex. Easton, Altos—Thomas Leyshon, Malcolm Morrison, Wm. Richardson, Trombones—Robert Easton, W. H. Anderkirk, H. Gate, Euphonium—John Stafford, Bass—D. E. Roberts, John Schrieder, Bass Drum—Dan McNeil, Snare Drum—L. J. Malhot.

There is a lot of good material in Coleman to make a first-class band. The boys had a good practice Tuesday evening, and their playing was exceptionally good. Any one who has previously played in a band is kindly asked to make application to the secretary, leader, or some one else connected with the band, so they can join. Practice well, boys, as you will be needed at the monster celebration on July 1st.

FRANK

Two Indian scouts are in town and two men have been arrested on suspicion for the murder of late constable Willmet.

W. Evans has returned from the old country where he has been on an extended tour. He is looking hale and hearty.

The Frank mine is getting a move on once more under entirely new management. General manager, W. J. Geesie, superintendent S. McV. Chas. Chestnut, pit boss. A new mine has been put in this week, and is being extended 3,000 feet. Development work is in progress and new hands have been employed. The "shooter" started its familiar rattle on Tuesday. It is expected to be going in full swing in June, as a contract has been secured from the Spokane market for 500 tons per day. Screens are ordered for the new tipple.

BLAIRMORE

From our own correspondent.

A new brick works is in erection on the grounds of I. S. Pelletier, being located by road side.

The fishing season is now in full swing and numbers of people can be seen daily passing to and fro with strings of fish.

The lime kiln owned by the cement plant is constantly burning, and is turning out first class lime. It is able now to meet any market both for price and quality.

S. Sargent of the Crow's Nest feed store, is very busy these days and we hear he has the contract to supply feed at the races on May 21 and 22. Success to the energetic Englishman.

The beauty of spring has commenced its work here and nature is now displaying her artistic powers producing the usual glory of scenery, making Blairmore the prettiest place in the Crow's Nest Pass, for residents.

The Coleman "Miner" is making its way into Blairmore very favorably and bids fair to be the best circulated and most useful of local papers in this place. We have hailed its advent and shall watch its progress with interest. The newly arrived constable Holmen to Frank barracks, who has taken the place of late constable Willmet, recently so brutally shot, is paying special attention to Blairmore and is to be seen cautiously patrolling this village.

It should be said to the credit of Blairmore citizens they are faithfully rising up to their religious privileges. On Sunday night the mission church was full to hear Rev. J. Sargent's preach from Rev. 2:12. Text "Antipas was my faithful martyr."

L. Dutil is having his large white house (now the Baptist church manse) thoroughly renovated. A cellar and out kitchen have been added by contractors Frier & Sinclair, and cotton, paper and paint have been applied to all the walls and ceilings by Messrs. B. Slemmon & Seclern, making it a very comfortable home.

INSTITUTIONAL CHURCH—Pastor, Rev. T. M. Murray. Services: Sabbath 11 a.m. 7:30 p.m. Sabbath school and Bible class, 2:30. Christian Endeavor, Wednesday 8 p.m.

Our Business Creed

We believe in the goods we are
handling and in the firm we are building
up and in our ability to get results.
We believe that honest goods can be
passed out to honest people by honest
methods. We believe in working not
weeping, not knocking, and in the
pleasure of our work, we believe that
a man can reasonably expect to get
what he goes after, that one deed done
now is worth two planned for the fu-
ture. We believe there is something
doing somewhere for every man ready
to do it. We believe we're ready right
now.

Alex. Cameron

Watchmaker, Optician
and Issuer of Marriage Licenses

PINCHER CITY LOCALS

A nice line of souvenir post-cards at
Morgan's.

A. A. Dick of Calgary, was in the
City last week.

Miss Elsie Harrod is visiting friends
in Macleod this week.

B. L. Griffith of Cowley, spent a few
days in the City last week.

W. J. Kemp is a busy man these
days, repairing and making new har-
nesses.

Go to Laidlaw's for your paints.
Martin-Senour mixed paints 100 per
cent pure.

Tomatoes at 10 cents per tin at the
Mercantile Co's, on the 7th, 8th and 9th
of May. See ad.

F. H. Robbins is having an extra
number of stalls put in the livery stable
to accommodate the trade.

James Watson has sold his quarter
section of land just north of the City.
The consideration is not stated.

Go to Laidlaw's for your hardware,
a complete line of roof and heavy
hardware at the lowest possible prices.

Herb Johnson, of the Alexandra Hotel,
left on Monday for Trail, B.C.,
where he will visit friends for a few
weeks.

C. Vent is getting a number of bug-
gies and wagons ready for the road. It
is understood some cheap rigs are to
be had.

Souvenir post cards representing
western types, wild animals, ranching
scenes, mountain scenes, patriotic and
comic, at Morgan's.

Erastus Cook is excavating for a
cellar under his house, and making
several other changes, which will much
improve the premises.

Miss Belle Cook has returned to her
home after her recent illness in Pin-
cher Creek. Her many friends will be
glad to see her round again.

Frank Liu, Oxford Cafe, Pincher
Creek, is buying a car load of hogs for
shipment to Madison, B.C. The price
being paid is 5 cents per pound live
weight.

J. A. Alexander is completing the
top floor of the Alexandra hotel. This
will make thirty-nine bedrooms in all
in this up-to-date house. The veran-
dahs will also be completed soon.

The farmers are very busy seeding,
there is not much hay or grain coming
in to the elevators. Seeding is pro-
gressing very favorably throughout
the district, many having completed.

Wanted.—200 men and boys to take
advantage of the great sale of mens
and boys clothing at Morgan's. They
are cheaper than at the catalogue
houses, and you have the advantage of
seeing the goods.

Glendower Allen, the government
telephone agent, informs us that in fu-
ture a toll of 5 cents will be charged on
all communications between Pincher
City and Pincher Creek. This is due
to the fact that the government have
installed a separate line between the
two towns. The service with the C.P.R.
station will be free. The charge for
non-subscribers and transients will be
10 cents.

W. McKenzie, of Summersville, had
his string of race horses into the City,
having them shod, and expects them
to do some good work again this
season. Geo. Holford of Craiback, B.C.,
has been employed by Mr. McKenzie
as jockey for the season. Mr. Holford
has had a great deal of experience in
his job both on this side and the other
side of the water, and should prove
very successful during the summer.

Miss Lillian Hagen, of Summersville
Centre, Nova Scotia, has been engaged
to teach the school here. It is expected
that school will start again about
May 15th. Miss Hagen not being
able to reach here before that date.
School teachers are scarce in the west.
It seems impossible to obtain one here.
Miss Hagen holds a first-class profes-
sional certificate and has had nine
years experience in teaching, and
should be able to obtain good results.

The Cranbrook Herald says in part:
"The latest addition to the journalistic
press is the 'Pincher City News.' The
true invariance of the establishment
of the News is the refusal of a paper
in the district to print the advertise-
ments of Pincher City 'merchants.'
The merchants of Pincher City are up-
to-date and this being the case they
need advertising, and as Mahomet
would not come to the mountain, the
mountain (that is the Pincher City
merchants) went to Mahomet. Hence
the Pincher City News."

The Pincher City foot ball team have
received their new outfit and present
a pretty appearance on the field. No
doubt the foot ball enthusiasts will be
more zealous in getting together from
now on, now that they can appear in
uniform. The uniform consists of blue
and white shirts in halves with collar
and pockets, blue knicker and leather
belts, golf stockings, while the "Cele-
brated Soft Shoes" will, without doubt,
maintain its reputation for making
goals. A match has been arranged
with Cowley team, to take place on the
local team's grounds just west of the
school house, on Friday the 1st of May,
and another on the 6th May with the
renowned Peigan team. It is intended
to have several practice games this
week when it is hoped that the play-
ers' position will be learned, and the
men placed to the best advantage for
the coming games.

Alberta's Busy Year

This promises to be Alberta's best
year. Immigration from the United
States, regarded in this part of the
dominion as the most desirable kind,
is expected to be very extensive this
season. These facts, along with the
revival in business conditions and the
advertising that both Calgary and Al-
berta will receive from the Dominion
Exhibition, give ground for confidence
in the immediate future of this city
and province, and should convince the
most skeptical that this is the best
place in Canada or the United States
to be doing business in today.

Speaking of American immigration,
the value of the settlers' effects brought
into Canada by American settlers con-
stitutes an important item in our im-
ports. During 1906 the settlers from
the United States brought with them
into the dominion, effects to the value
of \$40,000,000. In 1907 the value of
their effects was \$32,000,000 and this
year it will be still greater. These
figures represent an average worth
for each settler, in effects alone, of
\$800, showing that the people coming
in are a prosperous and valuable class.
There has been considerable discus-
sion lately on the fact that Canada's
imports have been exceeding its ex-
ports. If the excess is made up of such
imports as these there is little cause
for worry.—Calgary Herald.

The Farmers' Interests

Up-to-date Farming, A well known
paper devoted to the agricultural
classes, has instituted a campaign to
educate its readers to the realization
of the fact that the interests of the far-
mer are largely mutual with those of the
retail merchant, and is preparing to
show its subscribers that unless they
purchase their supplies from their
home merchants in preference to send-
ing away to catalogue concerns they
are acting directly against their own
interests. The Society of Equity, an
organization of farmers having a large
membership in Western Canada, en-
courages profit-paying prices, and will
doubtless bring about among its mem-
bers a general understanding of the
above theory, as well as a realization of
the other fellow's position in regard to
profit-paying prices and selling systems
and combinations, which are really
harmful, not only to the classes of
tradersmen directly affected, but to all
the people. For we all feel it in time.
If by any organization our farmers are
able to get a better price for their pro-
duce, we will all benefit in proportion.
This is true of every class with which
we are surrounded. The line which
divides profit from loss is too often an
invisible one, but organization and co-
operation bring it out in bold relief.

Cheer Up

Cheer up my friends, times may be
hard, but times can never be remedied
by talking about "hard times." A
prominent business man remarked to
a young man who made some refer-
ence to "hard times": "Young man, it
has been hard times ever since I can
remember." Change your tune. Re-
lieve the atmosphere of your thought
and think about the good times com-
ing by and by.
Walk on the sunny side of the street,
strike up a note of good cheer, failure
is looking for any man who cannot see
any chance for an improvement in the
money market. Manifest the spirit of
the merchant who, on the morning he
was sold out, put up the sign, which
read "Everything lost but wife, child-
ren, and hope, business will resume as
usual tomorrow morning."

Be Warned

A prominent manufacturer of ranges
has called attention to the practice
prevailing in some parts of the country
of peddling ranges direct to consumers.
It is pointed out that such a method of
selling, cuts the legitimate retail de-
aler out of their business, while the pur-
chaser actually pays more for the
range than if he had bought it in the
ordinary way. Another evil which
does not always strike the buyer until
too late is that it is always difficult and
frequently impossible to replace parts
of ranges bought in that way. Experi-
ence has shown that such methods of
trade are not economical, besides being
usually adopted on behalf of inferior
lines of goods.

Not to Be Soon

"Is your sister in?" inquired the ge-
ntleman caller.
"Yes," replied the youth of the
house, "but you can't see her."
"Oh! Is she sick?"
"Nope; she ain't sick. She's gone
an' locked herself in, so's nobody kin
see her."
"How ridiculous! Is she indisposed?"
"Nope; she's in the bath."—Judge.

No Bankrupt or Fire Sale, just an Immense Slaughter Sale
We must have room for Summer Goods that are daily arriving.
Never before such Bargains offered in the West

On May 7th, 8th and 9th, being Thursday, Friday and Saturday of next week, we will sell the well known Thistle Brand Tomatoes at 10c per tin. Not more than one case to each customer. Same price to mail order customers with \$10 orders.

∴ It will pay you to ∴
